The police were at first powerless to cope with the develop--monts, but they were subsequently reinforced and succeeded in separating the mob, after which ambulances were busy Kyoto. picking up the wounded.

CITY QUIET. No arrests were made, and the city was quiet in the evening.

CHURCHILL'S FEDERALISM.

"A PREPOSTEROUS FANTASY."

London, September 14.

Though Mr. Churchill was careful to say that he spoke only tentatively and speculatively and in no wise on behalf of the Government, his speech on Federalism respect. has created a sensation among all parties.

Unionists ridicule it as a preposterous fantasy and declare members of the Japanese Colony that it shatters the case for the in the city, attended the funeral present Home Rule Bill and was service in London, Mr. Kato, the obviously advanced as a sop to Japanese Minister, read an ad-

speech would have been admir- past the portrait of the dead Emable as a lecture to the British peror, and rendered homage. Association, but as a speech to constituents it is likely to be harmful by diverting attention from the urgent problem of Irish Home Rule.

The "Daily Chronicle" says it is not Federalism, but folly. Mr. Churchill now provides an argument for the advocates of separate treatment of North-East Ulater.

BRAZILIAN RUBBER.

THE COMING CRISIS.

London, September 14. A messago from Reuter's correspondent at Rio de Janeiro states that the annual report of the Minister of Finance, presented beat the Gentlemen and Players Sowerby. to Congress, contains a warning of England by six wickets. of the danger threatening the At Bray, in Ireland, Mr. Fry's rubber trade owing to competi- XI. beat the Australians by eight tion from India, Sumatra, and wickets, Coylon, Brazil has still priority in quality and quantity, but the East Indian rubber has the advantage of cheaper production and will shortly have the advantage in quality. SCIENCE OF ADVERTISING.

Advertising is both a science and an art. have studied that science.

Do you know the ART?

Can you write a catchy ad.?—very few can.

A'good ad. is one that catches the eyes, then holds the attention.

Can you do it? We can.

Let us write your ads. for you, insert them in any paper you fancy, but let us write them for you, we like it, that will be our recompense.

Choose your paper, put them in, watch results. ADVICE:-Insert them in the paper with the largest circulation—that is the secret of judicious advertising.

All the papers have the largest circulation, if you doubt it, ask them; then tell us, what they tell you.

The other fellow is losing all the money, True; that is the reason he is able TO KEEP UP the advertising rate!

THEY KNOW that the other fellow is losing money hand over fist, if YOU doubt it, ask them, they will tell you candidly; "it is quite true."

The cheapest ad. is the dearest. Why? do you know your business and ask why?

Do you advertise because of friendship? No? To reach the people? Yes, yes, that is the reason and it can only be accomplished by advertising in the paper that has the largest circulation. But if they all have the largest circulation, I must advertise in all the papers ? Culte so, if your like however

The Cost of Living

The increased cost of living is

question which stands like a

spectre on many a threshold, and

the time may come when nations

will learn to discard a great deal

of the luxuriousness of the pre-

wants and as a result the cost of

maintenance. The earth can yield

a great deal more, but there is

will yield a margin of profit, but

the point will be reached when

increases shall no longer be pos-

sible to the toiler, and when that

hour comes onlightened humanity

will pause in its extravagant pur-

suits and return to the fare which

satisfied our forefathers, and made

men of thom, and by that course

ensure greater and more per-

manent happiness than is now be-

queathed to the struggling, striv-ing mass which seeks to imitate the rich in every land.

of the Japanese, whose ships may enter Indian ports as freely as the ships of other nations, and may carry goods from one Indian port to another upon the same conditions as British vessels. But British ships cannot compete with Japaneso ships in the Japanese coasting trade, and the

opinion is expressed that it is doubtful whether Japan herself roaps any solid advantage from the embaidies it pays to the shipping companies.

Daily Press.

Oplum Smuggling.

More important still it is that greater efforts should be made to get hold of the men who are financing these enterprises, and deal with them as severely as the law permits. This duty is as incumbent on the Manila authorities YOUR EYES as upon the authorities of Hongkong, for there are consignees who take delivery at Manila when the opium is successfully smug! gled into the port, and it is unlikely that the firemen get more than a very small fraction of the large profit resulting from the enterprise. We do not know whother it would do much or anything at all to check"the traffic if the Magistrates were empowered to leave the Shipping: Company in possession of the drug found by their own officers or detectives illegally concealed on their ships. Their request, in 1A. O' Leville Street, Congkon : the circumstances, is not an unreasonable one, and should, we think, be considered by a higher authority, since the failure of the authorities to prevent the smuggling of opium out of the port renders ships arriving at Manila from Hongkong to the most drastic penalties. The more fact that the ship's captain becomes 15 mip. entitled, as the informer, to 10 mld. half the inadequate fine which 15 min. the Magistrate is empowered to 10 mla. impose does not seem a sufficient 15 mis. inducement for a Captain to put 10 min. himself to the trouble of taking care of whatever opium he may seize at 882 for the sole benefit

PRISONERS AND THEIR MAINTENANCE.

The annual return showing the expenditure and income of the and thirty-eight rounds with the the coolies were able to maintain the letter, and there was a draft pleaded guilty was fined \$500 a pitiable sight with mange) with-Hongkong prison during 1911 contains some interesting figures 7.5 in. which afford food for a little reflection. It is to be noted, for instance, that the expenditure showed a decrease of over \$3,000 as compared with 1910 and that the average annual cost per prisoner kindly presented a Challenge was \$60.80 as against \$80.80 in 1910 and \$91.97 in 1909. These Shield for the League competiare very material reductions which suggest either that economy is being rigidly practised or that the earnings of prisoners have considerably increased. Probably the real explanation includes little of both factors. The point may be considered, however, are invited to send in their entries whether the annual sum paid out of Colonial revenue for the maintenance of prisoners might not further be reduced by making Secretary, Mr. M. S. Northcote. more use of the time and labour of prisoners. If a man commits an It is to be hoped that the possesoffence against society there is no reason in the world, why society should have to pay more than can be helped for his maintenance, during his incarceration, and there is every reason for making him do useful work, if possible.

The returns under consideration show that of a daily average of 595 prisoners we find that 105 were employed on "Orank, shot, shot and stone." Turning a crank may be excellent employment for a certain type of prisoner, but it is in no way remunerative. The value of the labour of these 105 male prisoners is exactly nothing. That of the cakum pickers, who numbered 146 daily, was only \$905. The value of their work is estimated at two cents per day. Prisoners engaged in carpentering, printing, book-binding, and shoe-making, on the other hand, perform work rated in value at twenty cents per hour. If, again, we turn to the table showing the "value of industrial labour" for the year, we find that the actual value of the earning of the 91 men engaged in printing and bookbinding is \$41,057. That of the 146 engaged in oakum-picking is \$934 And 105 mon spent a whole year, working more or less hard and making nothing.

Whether inside or outside of prison craftsmen will always be worth more than mere labourers. But that argument is not exhaustive enough to meet the case under notice. The point is not so much whether the crank-turners and the oakum-pickers were constitutionally or by want of training loss useful than the carpenters or shoemakers or printers, as whether the prisoners at present doing non-productive work could not be put to employment side with mats and wood and have transferred under instrucof actual use to the Colony. Some little time ago a suggestion was made in these columns that prisoners might be formed into chain applied. As the load of water subject of doubt are to submitted gangs for road-making and put under the charge of Indian soldiers. got lighter the vessel gradually for consideration. This would serve a useful purpose in various directions because it rose until she was at her normal Veterinary Officer: Captain would enable some necessary public work, in the way of road-making level. She has been towed to H. Greenfield, Army Veterinary and the like, to be done in the outer borders of the Colony, and it Tanjong Pagar for survey and Corps, has been detailed for duty Watt):—Unless you are convinced sufficient to one ure that the past circumstances, is inexplicable, would keep at least some of the Indian soldiers in work, It would, repairs. moreover, by making openly public example of prisoners, help as a deterrent to would-be oriminals and would relieve the congestion at present obtaining in the prison.

Older readers will recall that in the earlier days of the Colony, programme this week. In addi- kong or other stations in the prisoners were put to outside labour. LOG BOOK.

Death of an Engineer-Admiral.

The sudden death recently at Bad Nauheim of Engineer-Admiral J. Corner removes one of the most prominent and i ble men ever associated with this branch of the Navy. He retired in 1909. on age limit after twenty-nine years of service. For eleven years prior to retirement he was manager of the engineering department at Portsmouth Dockyard, and his work during the period covering the introduction of Dreadnoughts and turbines has left a useful mark.

Big Ocean Liners. If we were astonished at the magnitude of the Titanic, we are still to open our eyes in learning of the great liner nearly finished for the Hamburg-Amerika Company, the Imperator which has a gross tonnage of 50,000, and her length is about 900 feet. She has eleven decks, and is already called at home the Atlantic Skyscraper. Her weight without her engines. boilers or cargo, is about 77,000,000 lb. orabout 20,000,000 lb, more than a fully armoured Dreadnought. Sho is said to be a triumph of the builders' art, the finest and largest passenger ship affoat, the largest up to the time of another recent interesting announcement by the Cunard line.

The Cunard Company's new liner will be a vessel of 55,000 tons gross, and will carry 6,500 passengers, 1,500 more than the Imperator. The builders are said to have carte blanche orders to make her the greatest floating palace ever constructed. After reading these announcements, we wonder where the mania for building big ships will end. The Companies say it is to meet the demand of the millionaries and their families, who travel abroad more when they can secure luxurious accommodation. Every now overhauled its hips, and and better life saying equipment. The British-India Company have gone further, and are equipping most of their vessels with wireless apparatus. Most of the great Atlantic and Pacific liners now have wireless, and many issue a sea, giving a brief summary of the world's events.

It is evident that the tendency to build larger ships has not been materially affected by the Titanic accident, but the builders have radically changed their plans of equipping them with life-boats and belts. It is understood a Committee has been appointed by the shipbuilders of Great Britain and America, to investigate all the appliances submitted during the past year, with a view of selecting the most modern and the safest system of saving life at sea. There is no doubt that the Titanio disaster has stirred up a graver responsibility in the minds of the big shipbuilding corporations than cred regard for the value of a human life, when given into their. keeping on the high seas, in the

The great danger in constructling of them when leaving port, and upon their arrival distination. It will be remembered that both the Olympic and Titanic had narrow escapes in getting safely away from the wharf in Liverpool, and pm. out of the harbour without dip.m. saster to shipping in general and 1st, at 1 p.m. themselves in particular. The pm draft is so great, the enormous p.m. amount of water displaced by 12th at 1. p.m. these huge hulls, and the vacuum caused, is a constant menace to smaller vessels in close proximity to them, while smaller craft along the shores suffer greatly from the "rollers" caused by the passing of such large vessels. If 50,000 tons is to be the standard capacity of the future, and 900 to 1,000 feet the minimum of length, for all liners to be constructed, then everything will have to be built larger in proportion. Wharves, landing stages, pilot tugs landing quays, slips, will have to be more than doubled in size. while all vessels of much smaller tonuage will have to be replaced by

that the Fusion members of the J. Reisler (John the Barber). Board, under the leadership of mittee, mean business, and that the Metropole doorway, a few they believe they have the seconds before the gambler apof the Board.

Not a Joke.

"The Mayor, like many other good people, seems to have an idea that the Aldermen of this city are a joke," said Curran today. "This time he may find that if there is any joke it is on him. We are going to see this thing through."

Incidentally, Curran said he had received numerous letters and that it was up to the Aldermen to start an investigation. One writer enclosed a list of places, which he said were running in the most open sort of way without the slightest interference. There were some sixty places mentioned in the list. The writor gave their addresses, and they were all in the zone between venth Avenue.

While there are difficulties in er Waldo: the way of carrying through their proposed investigation, the fu- vised Herman Rosenthal sion leaders believe they can throw out policemen: In the swing enough Tammany votes to first place, I am not in the habit, secure the necessary sixty for an of using that kind of language, appropriation. We gencies, either of forecast or hear, says the "Manchuria Daily one of the largest Japanese bean firms of Dairon, have taken the initiative in the matter and sent Mr. Tsunoda, of the Company, to the above-mentioned ports in order to make the necessary arrangements. When these arrangements come into operation, Japanese bean steamers will come in for a good share in the export of staple produce to South Ching. which is now carried almost exclusively by the China Navigation Co.'s steamers and the Norwegian ships belonging to Messrs. Pedersen & Co.

> Kedah Rubber Company. The annual meeting of shareholders in the Kedah Rubber Company was held at Penning on August 30, the Hon. Mr. Adams

The Chairman said that after deducting \$43,313, due to creditors, there was a balance of \$86,491. The directors recommended a dividend of 5 per cent. leaving \$61,721 to carry forward. The expenditure on development averaged \$7,000 permonth. They had been cleared of timber and roots and with the drainage this. had cost \$7,660. The directors. buildings, leaving \$58,218 for bringing the whole rubber average of 1,500 acres into bearing. 41,000 trees being tapped; and That commonest of all common | histore the end of April another phrases, "catching cold," has 25,000 would be tappable. He In an allotment, garden in long been pronounced by high estimated an output of 90,000 cold at all; if we catch anything, been collected at an average of it is the bacteria which cause the 1.78 per tree; it was sold at an illness generally described which average of 4/61d. The directors as a cold. There are several of would propose an interim divithere long-named contures, and, dend in September. He thought the confidence of those who had placed money in the venture was justified by results.

The accounts and report were

Petrol and Patriotism. Prince Honry of Prussia has inby the owner, Major Mercer, a other disease, but the illness will the "Allgemeine Automobile" member of a family which has appear when predisposing factors Zeitung" appealed to German figured largely in Scottish history, stir the bacilli into activity. An motorists to use benzol instead of and the Office of Works have ac- extremely interesting paper has petrol on the grounds of both cepted the offer under the terms recently been written on this patriotism and economy. His of the Ancient Monuments Act. general subject by Dr. William Royal Highness states that now This Act enables the owner of Brady in the "New York Medical attempts have been made of late any scheduled monument to place Journal," and its whole purport is to replace the foreign product it under the protection of the that we can avoid these predispos- petrol by the home manufactured State without diminishing his in- ing factors. "No one ever caught benzol, and he goes on to give terest in it, except that thence cold," says Dr. Brady, "through several instances where long dis. forward he and his successors cold fresh air;" no one, it is as tances, such as 418 miles, were serted, ever catches cold in the covered at an average speed of 25 Arctic regions. But "housed-up m.p.h. with a consumption of mollycoddles" are in danger, and only 109 litres (quarts) of benzol, Mr. John Mulhall has resigned the things to avoid are such as or 425 miles with a 100 h.p. car which he has held since 1892. enting. More often than not the 138 litres. As benzol only costs cold, fresh air is an unmitigated away with by the use of properlyblessing." This dictum, which is constructed carburetters allowing undoubtedly the last word and the a greater inlet of air. More than truest word from science, as it is 20 per cent. of the German also plain common sense, may recall benzol output is exported for to some of our readers the story of French use. But, H. R. H. the man at a lecture who rose adds, "the real importance of the present who believed in Christian petrol prices are dictated to us by of that faith arose, the man who America. German automobilism had made inquiry calmly asked is entirely dependent on imported the Obristian Science adherent to spirit at present, and this would change places with him, as he mean a great national danger in. himself was in a draft and in time of war, Quite apart from danger of catching cold, and the the financial view of the question? demonstrate clearly our relations at Eton College, in place of Mr. the application of the loan and its other man would be immune.
